CHERRY PUA AFRICA · HUMAN TRANSFORMATION

People don't change because you told them to.

They change when
something moves them.

Cherry Africa designs human transformation for leaders, teams and organizations—starting with the reality inside the room.

Listen before you try to move.

The strongest intervention is not the loudest. It is the one that understands the room precisely enough to matter.

Not motivation

for motivation's sake.

The stage is only one moment. The work is what people see differently, say differently and do differently after they leave it.

Cherry's public body of work spans speaking, coaching, leadership, human behavior, books, media and WorldStage transformation work. This page treats that history as an evolving body of work—not a pile of credentials.

05 / PROOF, NOT LOGO SOUP

Credibility should be felt in the evidence.

Approved client stories will live here one at a

time: challenge, discovery, intervention, what changed, and what the client permits Cherry to say publicly.

01

SPEAK

Keynotes designed around the specific room—not a recycled speech.

02

AWAKEN

Leadership and human transformation that starts with what is actually happening.

03

there was

GIRL ON FIRE.

Keep the fire. Lose the cliché. Treat it as heritage: a chapter in Cherry's public identity that evolved into a broader body of work around people, leadership, emotion and transformation.

PROTOTYPE PRIVACY BOUNDARY

Keep confidential client and participant information out of Discovery for now.

Use generalized, non-confidential organization context only. Do not enter participant responses, private client documents, credentials, payment data, health information, legal-privileged material, or other sensitive information.

If you later choose the contact handoff, you may enter your own business contact details. That draft stays on this device and nothing is sent automatically until you review and send the prepared email yourself.

I understand — continue with non-confidential Discovery
